

Amendment to the Abstract:

Please amend the abstract as follows:

The transportation system, such as airplane, which comprises the internal-wireless-communicating-system, the external-wireless-communicating-system, the audiovisual-outputting-system, and the computing-system. The computing-system implements the entertainment-mode (e.g., providing Internet-service and TV-program-distributing-service) and the security-mode.

The transportation system, such as airplane, which comprises the cabin, the internal antenna system, and the external antenna system. The voice data and the non-voice data of a plurality of passengers located in the cabin are received via the internal antenna system and transferred via the external antenna system. The TV data received via the external antenna system is distributed in the cabin.
